

A project in

SQUARESPACE & LODGIFY MANAGEMENT

Music City Suites is a collection of luxury vacation rental apartments in downtown Nashville, Tennessee. The managers of the property were seeking a professional web presence along with a rental management platform. After redesigning and updating their Squarespace environment, we implemented Lodgify to manage customer reservations. Throughout several years of working with Music City Suites, I have provided regular website updates, Lodgify technical support, email marketing services, and design services.

The managers at Music City Suites have passed my services along as a referral to several local contacts for other services. We continue to work together on regular updates & announcements.
