

A project in

SQUARESPACE MANAGEMENT

Elifant Archaeo-Culinary Tours is a travel tour company that specializes in itineraries focused on food and archaeological routes. Their tours take guests on culinary journeys and exploration of ancient ruins throughout the world. The principals of Elifant were in need of a Squarespace resource to assist in regular site updates, such as tour listing updates, reservation form configuration, gallery design, and feature troubleshooting. I continue to provide regular website support for all things Squarespace.

Elifant has been an active client for several years and continues to engage my Squarespace services for regular website updates & revisions.
